Blackmer® XLW Series Sliding Vane Pumps Easily Handle Abrasive Liquids Found in Paint and Adhesive Processing

Grand Rapids, MI – Blackmer®, a global leader in positive displacement pumps and an operating company within Dover Corporation's Pump Solutions Group (PSG™), announces that its XLW Series of sliding vane pumps have been designed to handle liquids with suspended particles up to 250 microns and 25-percent concentration such as oxide primers, inks, paints and adhesives.

XLW Series pumps are design with hardened ductile iron materials, giving the pump the unique capability of easily handing abrasive liquids. Available with O-rings, mechanical seals, relief valves, springs, vanes and rotors, the XLW pumps may be fitted to handle a wide variety of materials. Base mounted unit assemblies with a helical gear reduction drive are available for all XLW models. XLW pumps are available in 2- and 3-inch port sizes and are available in flanged ports with NPT, weld, ANSI and DIN options. The XLW Series pumps offer flow rates between 6 gpm and 85 gpm (23 to 320 lpm) with differential pressures to 150 psi (10.34 bar). The pumps provide excellent self-priming and dry run capabilities, and include an adjustable relief valve that protects the pump against excessive pressures.

Utilizing Blackmer's unique sliding vane designs, the XLW Series positive displacement rotary pumps offer the best combined characteristics of sustained high-level performance, energy efficiency, trouble-free operation and low maintenance cost.

For more information on Blackmer® XLW Series Sliding Vane Pumps, please contact Tom Stone at stone@blackmer.com or (616) 248-9252, or visit www.blackmer.com.

Blackmer® is the leading global provider of innovative and high-quality rotary vane pump and reciprocating compressor technologies for the transfer of liquids and gasses. For more than a century, the Blackmer name has stood for unparalleled product performance, superior services and support, well-timed innovation and a commitment to total customer satisfaction. Supported by a worldwide network of distributors and original equipment manufacturers, Blackmer pumps and compressors are used in a multitude of applications in the Process, Energy, Transport and Military-Marine markets. Blackmer - headquartered in Grand Rapids, Michigan, USA - is a member of Dover Corporation's Pump Solutions Group (PSG™).
