Blackmer[®] Introduces the TXH35A High-Speed Pump For Petroleum Products

Grand Rapids, MI – Blackmer[®], a global leader in pump and compressor technologies and an operating company within Dover Corporation's Pump Solutions Group (PSGTM), has announced the availability of the latest addition to its high-speed truck-pump product line: the TXH35A model. The pump was launched at the recent National Tank Truck Carriers Maintenance Seminar and Exhibition, which was held from Oct. 26-28 in Nashville, TN.

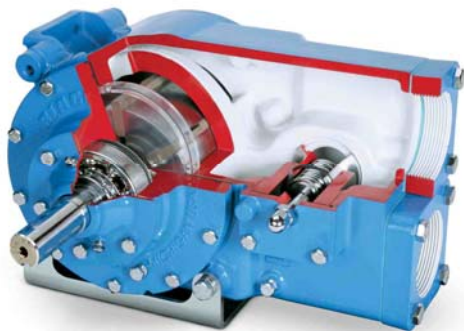

The TXH35A is the newest member of Blackmer's family of TX/TXD Series pumps, which are designed to handle clean petroleum products such as gasoline, diesel, fuel oil, kerosene, avgas, jet fuel, biodiesel ethanol, biofuel blends and light lube oils. The TXH35A is a truck-mounted, cast-iron, 3-inch ported pump that can run at a maximum speed of 1,000 rpm and deliver approximately 300 gpm.

Other key features of the TXH35A pumps include the ability to handle viscosities to 20,000 ssu; FKM elastomers; parallel ports with either NPT or weld flanges; a mounting bracket that can be used in one of three positions for easy pump installation; 3-inch bearings; and FKM mechanical seals. The TXH35A replaces Blackmer's ATX300 Aluminum truck pump.

For information on Blackmer's new TXH35A sliding vane transport pumps, please go to www.blackmer.com.

Blackmer[®] is the leading global provider of innovative and high-quality rotary vane pump and reciprocating compressor technologies for the transfer of liquids and gasses. For more than a century, the Blackmer name has stood for unparalleled product performance, superior services and support, well-timed innovation and a commitment to total customer satisfaction. Supported by a worldwide network of distributors and original equipment manufacturers, Blackmer pumps and compressors are used in a multitude of applications in the Process, Energy, Transport and Military-Marine markets. Blackmer—headquartered in Grand Rapids, Michigan, USA—is a member of Dover Corporation's Pump Solutions Group (PSGTM).
